

Backed by Bayer

The extensive testing of Kordon by Bayer and various independent authorities has established that the barrier should remain effective for over 50 years – the commercial life of a building.

Bayer back those findings with Kordon's 10-year \$100,000 structural timber replacement warranty against termite penetration when correctly installed by a currently accredited Kordon installer.

Once the building project is completed, Bayer and the accredited installer provide a complete set of documentation to the building owner. These documents include:

- the **Kordon 10-year Warranty**;
- a **Certificate of Compliance** to Australian Standard 3660.1-2000 and the manufacturer's specifications;
- an **Installation Report** detailing exactly where Kordon has been installed; and
- the **Annual Inspection Sticker** to record the date of regular inspections.

In addition, Kordon is certified by the Australian Building Codes Board – certification number 2003/001 – and has been tested and approved for use in 'allergen-free' construction.
